

Eduphoria

NOVEMBER NEWS & UPDATES

TEST AUTHORING BETA

Have you tried Beta yet?

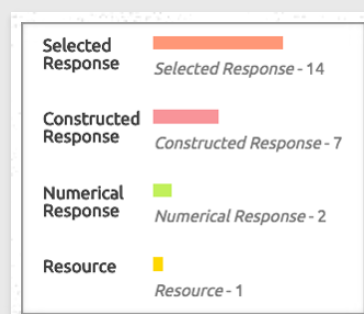

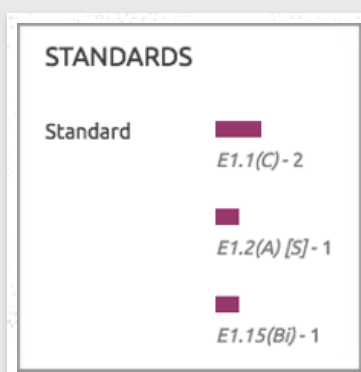

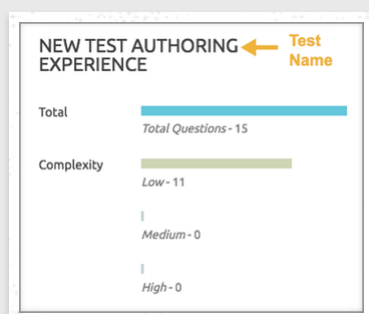

Eduphoria has streamlined the test creation process allowing you to focus on creating a higher quality assessment. New features include a new information panel with question types, count, & complexity level. The redesign also implements an easier layout to interact with, resulting in less clicks for the test creator. Currently, you are able to toggle back and forth between Classic and Beta Test Creation.

Click on the document below to download the Beta Quick Guide.

UPDATES TO ONLINE TESTING & THE NEW TEST PROCTORING

Take a look at the short video below to see enhancements to the Online Testing system within Eduphoria, including a preview of the upcoming Test Proctoring options. Updates will allow teachers the ability to monitor & manage student test sessions in real-time.

NEW LEAD4WARD TEACHER REPORT

The New Subcluster Intervention Report is now available to teachers. It helps teachers look at student performance beyond pass or fail. The simple data display makes it easier to analyze student performance within subclusters and target individual students with interventions.

Subcluster Intervention Report

While our Student Learning Reports help identify specific parts of the curriculum where students may need support overall and enhances data analysis for instructional planning, this tool helps teachers look at student performance beyond pass or fail. In the Subcluster Intervention Report, student performance is analyzed within each subcluster to guide teachers in providing targeted intervention.

Within each subcluster students are organized into two categories:

- **Got it!** ... students who scored greater than or equal to 65% on all items aligned to the subcluster
- **Not yet** ... students who scored below 65% on all items aligned to the subcluster

Teachers may find it helpful to have the corresponding student learning report available when using the Subcluster Intervention Report.

1. Pick a grade and subject from the list on the left.
2. Filter the results to a specific section, or show all students.
3. Select one or more local assessments.

1. Grade Level / Subject

Choose a tested grade level/subject combination.

2. Filter

Only show students who are in the following class...

All Students, -

3. Assessments

Choose one or more local test types for the current school year
