

Career & Technical Education

Preparing students to succeed in further education and careers

Teachers

- Identify certifications and what courses can be taught/offered for endorsements
- Participate in professional development at the district, region, and state level
- Maintain a rigorous level of instruction in addressing all TEKS

Students

- Identify student certifications and credentials to offer
- Prepare students for college and career readiness
- Explore career options and opportunities in middle school/junior high
- Analyze student data and performance

Business & Industry/Higher Education

- Explore and develop partnerships that allow students to enter/participate in:
 - A postsecondary program without remediation
 - An apprenticeship program
 - An internship as part of a credential/certification
